NHG-AHPL RESIDENCY
Tan Tock Seng Hospital
11 Jalan Tan Tock Seng
Singapore 308433
www.nhgresidencyprogram.com.sg
The program includes 3.5 years of dermatology education which is preceded by a broad-based clinical educational program. This broad-based clinical education is attained through the Internal Medicine (IM) Residency Program. The 3.5 years dermatology education provides continuous base of active participatory study and experience in clinical dermatology and rotation through the various core dermatology subspecialties. The program will include instruction in the pertinent basic sciences, training in research and teaching.

The 10 core dermatology modules have been selected based on the major dermatology themes reflecting importance in future clinical practice.

The core dermatology modules include:

I. General Dermatology
II. Sexually Transmitted Infections
III. Dermatopathology
IV. Procedural Dermatology
V. Contact & Occupational Dermatoses
VI. Cutaneous Infections
VII. Immunodermatology
VIII. Pediatric Dermatology
IX. Photobiology, Phototherapy and Psoriasis
X. Inpatient Dermatology

In the first year, emphasis shall be on general dermatology, dermatopathology, basic surgical procedures and sexually transmitted infections. In the second year, you shall be given clinical exposure to subspecialties in dermatology, including procedural dermatology, contact and occupational dermatoses, cutaneous infections, immunodermatology, pediatric dermatology, photobiology and phototherapy and inpatient dermatology. In the third year, the emphasis shall be on consolidation of knowledge and attainment of independent professional competence.

**TRAINING SITES**

Main Training Site:
National Skin Centre (NSC)

Participating Training Sites:
Changi General Hospital (CGH), National University of Hospital (NUH) and Singapore General Hospital (SGH)

The Dermatology Senior Residency Program is a competency-based program designed to provide you with the educational and practical experience that will permit you to deliver specialized care to patients with diseases of the skin.

**OVERVIEW OF THE PROGRAM**

**FREQUENTLY ASKED QUESTIONS**

**AM I ELIGIBLE TO APPLY FOR YOUR PROGRAM?**
If you are local-trained, you must currently be completing an IM Residency Program. If you are foreign-trained, you must have completed an equivalent structured training program in The United States, United Kingdom, Canada, Australia or New Zealand subject to review and approval by the Specialists Accreditation Board.

**HOW CAN I LEARN MORE ABOUT YOUR PROGRAM?**
An open house will be held at National Skin Centre, the main training site approximately 4-8 weeks before application opens. Please visit http://www.nsc.gov.sg/ for details and information on the open house. During the open house, you will get to meet with the Program Director, Participating Site Directors, Core Faculty and Chief Resident and find out more about the program.

**WILL THERE BE AN INTERVIEW PRIOR TO APPLICATION?**
An interview will be arranged soon after the National Skin Centre’s open house for interested applicants. The interviewers will comprise of senior doctors from the Residency Advisory Committee, Heads of Departments, Program Director and Participating Site Directors. The purpose of this interview is to internally rank all potential applicants prior to application and matching exercise conducted by the MOH Holdings (MOHH).

**HOW DO I APPLY FOR YOUR PROGRAM?**
The application is centrally coordinated by MOHH. The application period for Senior Residency programs will be held yearly during March/April period. Please visit their website at http://www.physician.mohh.com.sg/residency/ for details and information on Senior Residency application.

**ARE THERE SCHOLARLY ACTIVITIES IN YOUR PROGRAM?**
The program will offer you ample opportunities to participate in scholarly activities. You will be instructed on the practical and ethical aspects of research prior to participation. You will be encouraged to participate in prospective clinical studies, retrospective studies and perform case write-ups during your 3.5 year Senior Residency. You will be encouraged to deliver oral or poster presentations in local as well as regional dermatology scientific meetings such as the National Skin Centre’s biannual Dermatology Update and Dermatological Society of Singapore’s Annual Scientific Meeting.
